Settings in the graphical interface

When launching GNOME 45 Settings, it is highly recommended to go through all available sections and explore various settings. Don't hesitate to experiment with different options and determine which ones require modification or customization.

~~Don't be intimidated as it's not as challenging as it may seem. Just keep an open~~

Check out the various settings in the ‘Settings’ Gnome App, as there are many options you may want to customize to your liking. Some of the settings you might want to adjust include the desktop appearance, privacy, power, region and language, users, keyboard layouts, and shortcuts. Ultimately, it’s up to your personal preference and needs

Google apps and services such as Google Play Store, Google Maps, and Gmail. Your preference and needs will determine which of these two options you choose. You can select VANILLA if you prefer a more minimalist approach or do not require Google apps and services. If you rely on Google services, the GAPPS option is preferable.
